

BPT Trusted
Parts Suppliers

S550 Mustang GT & EcoBoost Performance Parts

Specialising in Ford Falcon, Mustang and F Series Trucks

B.P.T. Motorsport specialise in the factory and aftermarket performance modifications and products for anything Ford. Every product we sell has been sourced, researched and developed to suit everyday driving conditions and off road racing. We understand the full operation of our products and our staff are all qualified Ford trained specialists in their field.

Development of new products for the Mustang is an ongoing task of which we strive to stay one step ahead of the rest, this is why we are the number 1 choice for Genuine Ford Racing Parts, aftermarket accessories and components.

As with tradition on past Ford vehicles we have acquired our own 2015 Mustang GT for development and testing of new concept parts and accessories. From this BPT has crafted what we have coined the Mustang Pegasus. A legend in its own right tried and tested here in Perth Western Australia. The Mustang Pegasus by BPT meets the precise standards you would expect from an Original Equipment manufacturer and is backed by our 70 years of combined technical experience and know how.

Mustang Pegasus by BPT Motorsport
