

Mustang GT 627 HP Supercharger Kit

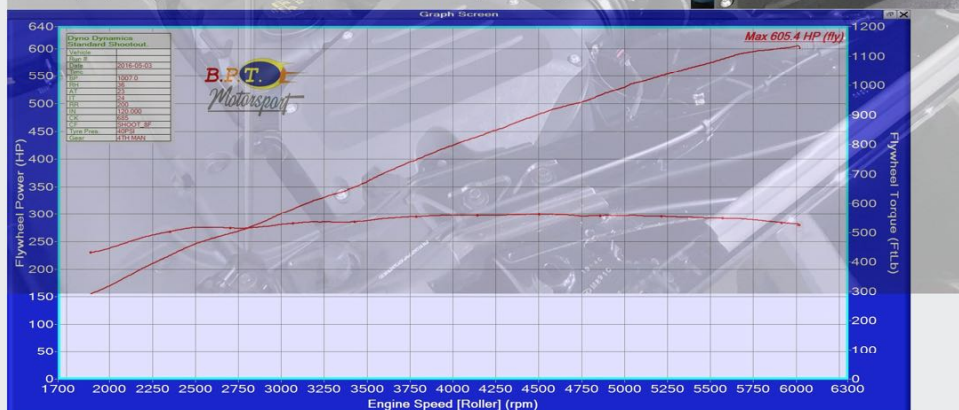

M-6066-M8627

Ford Racing 2015 - 2016 Mustang GT 627 HP supercharger kits have been developed with ROUSH Performance to produce a whopping 627 hp @ 6,900 rpm and 540 ft.-lbs. torque @ 4,700 rpm, using approximately 9 psi of boost with 98 octane fuel. They feature a 2.3L Twin Vortices supercharger (TVS) assembly using the latest TVS technology. The new Twin Vortices series features four - lobe rotors and high - flow inlet and outlet ports which vastly enhance thermal efficiency, enabling greater volumetric capacity at higher rpm. Ford Racing 2015 - 2016 Mustang GT 627 HP supercharger kits include the lower intake manifold, Twin 60mm electronic throttle body, air inlet system, 47 lbs./hr high-impedance fuel injectors, and fuel rails. They're complete with air - to - liquid intercooler system intercooler pump, heat exchanger, and intercooler reservoir. The kits use a FEAD 6 -rib drive belt system and have a Ford Racing ProCal tool with performance calibration for significantly improved throttle response and performance feel.

Boosted Performance

Ford Racing Kit M-6066-M8627 power figures quoted on USA based vehicles.
BPT Motorsport power figures are based on chassis dyno results and will read higher on hub dyno machines.

With the re-introduction of Mustang into Australia BPT has wasted no time with sourcing of performance parts and accessories direct from the United States, in fact BPT has been servicing and modifying Ford Mustang for years and are ready and tooled up to take on any task be it Custom tuning or supercharging.

Every Ford Racing Supercharger package fitted by BPT Motorsport comes with;
Roush Performance 1 Year/19,000 kms Limited Parts Only Warranty.
Optional Department of Transport (DPI) certification of fitment in state of Western Australia.
Optional BPT Motorsport Limited Powertrain Warranty.
Revised engine bay Cross Bracing to retain rigidity in front end assembly.
Installation and Warranties carried out in our Perth workshop facility, Not Interstate.
